OFFICIAL DIESCEY.-The individuals who, by the favor of the People and the accidents of politics, occupy the prominent civil stations in Illinois, seem to be sadly wanting in respect for themselves and for the offices which they chance to occupy. It is due to my personal friends (and proud am I to number many of all political parties among these) to state that the charges complained of are made by one whose name I never heard of until I saw it at the head of his foul and begrimmed sheet -that I have understood him to be a brief-less petitogger, and a poor, miserable, God-stricken, physical abortion, whom to notice in any case, but such as the present and in such terms, would be the grounds upon which the United States base passed through the straits of Lamaire in 12 days. danning self-degradation."

STILL FUNTHER SUCCESSFUL RESEARCH STAT tew days before the date, the Scientific Congress now assembled at Naples, led by heir resident, M. St. Angelo, repaired to Pomperi, where, in the presence of this society, investigations were instituted under the direction of M. Carlo Bonucet, Chief Conservator of the Antiquities of the kingdom. The operations were crowned with success. In a street in the vicinity of the Augustan temple they discovered, two shops fitted up with different itchen utensils made of iron and bronze, which were in all proability exposed there for for sale. Opposite these shops they discovered a magazine, containing blocks of native and African marble, and five statues of white marble of different sizes, including that of a fawn, and another representing the skeleton of a woman enveloped in a flowing drapery. In this last statue the learned archivologists present recognized the Goddees of Envy. At one of the extremities of the Rue de la Fortune they cleared their way to a house which contained on the ground floor a large saloun, filled with various articles of office furniture in one of which were found some silver coins of the reigns of Vespasan and Galba, and several marble weights. The most expanded movement of the banks of this country was in 1837, the year of the suspension of specie payments, when the line of discount was just about double what it is at present, and the issue of paper nearly two for one. It will be observed that the discounts of 1845 are nearly \$33,000,000 greater than in 1844, and the circulation in 1845 exceeds the circulation of 1844, nearly \$13,000,000.

EMPIRE Hot Air COOKING STOVE.

L. J. FARWELL—Rogers' Blook, on East Water street—Now offers to the public this approved Cook Stove, of different sizes, to suit small families, or large Boarding Houses or Hotels. The high character which this Blove has obtained wherever it has been introduced, is a guaranty of its excellence. The complete success which has attended the introduction of hot air into the oven, and other improvements in the construction of the Empire Stove, justify him in warranting them to bake equally as well as a brick oven, and to perform all other operations in cooking with 50 per cent less fuel than any other cooking stove now in use.

An examination of the stove will ensure its sale, and a trial of it fully realize all reasonable expectations. THE EXCITEMENT at EME-
